

Synchronized Timing and Communication Systems

All over the world synchronized timing and communication is important. Our customers include hundreds of school districts throughout the United States in addition to some of the most recognizable entities in the world, some of which include;

Yale University
City University of Hong Kong
Amazon
Cedars Sinai Hospital

European Space Agency
General Electric Corporation
University of Texas
Duke Energy

The importance of accurate reliable time allows government, business and healthcare to achieve and operate at a higher level. In healthcare the requirement to chart accurate time when a patient arrives at the hospital to when medicine is applied and procedures are performed not only affects a patients well being but is also important for liability and insurance issues. At all levels of education you have students, teachers, professors and staff on the move from the classroom to the lecture hall to one building to the next building all on a schedule time. Synchronized clocks ensure that people arrive on time and lectures begin on time and the teaching time is maximized.

Our public address systems help organization in non-critical situations and in emergency situations. All organizations must be able to communication to employees, students and visitors and our communications product provide an effective way to accomplish this.
